Personalized Hypothetical Illustration

Income Pay Pro℠ 10

Issued by North American Company for Life and Health Insurance®

Modified Single Premium Deferred Annuity
Qualified Contract

Prepared for:

Owner: Kim Ruth
Issue State: IA

Agent/Representative:

JOSH MILLANG
Date Prepared: 04/15/2026

This is an illustration only, not an offer or contract. It is not intended to predict future performance. Benefits are subject to the terms and conditions of the annuity contract.

FOR ILLUSTRATED VALUES, GO TO PAGE 7

GENERAL PRODUCT TERMS

Listed below are some basic terms and their definitions. Please refer to the product brochure and disclosure statement for more information.

PREMIUM

The amount paid into the annuity contract.

ACCUMULATION VALUE

The premium and interest credited, if any, less withdrawals and rider charges.

DEATH BENEFIT

The Death Benefit is equal to the Accumulation Value (including any partial interest credits) but will never be less than the minimum requirements set forth by state laws, at the time of issue, in the state where the contract is delivered or issued for delivery.

MARKET VALUE ADJUSTMENT (MVA)

May be applied during the Surrender Charge Period. See the MVA section at the end of this illustration for more information.

SURRENDER VALUE

The amount that is available at the time of surrender. The surrender value is equal to the Accumulation Value, subject to the MVA, if any, less applicable surrender charges, and applicable state premium taxes. The surrender value will never be less than the minimum requirements set forth by state laws, at the time of issue, in the state where the Contract is delivered or issued for delivery.

SURRENDER CHARGES

A surrender charge is assessed on any amount withdrawn, whether as a partial or full surrender, that exceeds the penalty-free withdrawal amount. A surrender during the surrender charge period could result in a loss of premium. Surrender charge schedule may vary by state.

Surrender Charge Schedule Years 1 to 10:

10%, 10%, 9%, 9%, 8%, 8%, 7%, 6%, 4%, 2%

PENALTY-FREE WITHDRAWALS

Once per year, you may take a Penalty-Free Withdrawal (also known as a Penalty-Free Partial surrender), without surrender charges, or MVA, of up to 10% of your Accumulation Value.

ANNUITY PAYOUT OPTIONS

On your Maturity Date (the contract anniversary when the Annuitant is age 115), the pay-out options available include: Life options, Joint and Survivor options and Period Certain options. An example of a 10 year Period Certain based on Guaranteed Values as shown below.

	Accumulation Value at Maturity	Monthly Factor/$1000	Monthly Annuity Income
Guaranteed	$0.00	8.96	$0.00

INDEX ACCOUNT

Some or all of your premium may be allocated to the Index Account, which offers several different indexes and crediting methods.

FIXED ACCOUNT

Premium allocated to the Fixed Account will earn the current interest rate, which is credited daily. The declared fixed rate is an annual effective rate.

CREDITED INTEREST RATE (INTEREST CREDIT)

The rate of interest credited from the Fixed Account and Index Account(s) to the Accumulation Value.

Each of North American's crediting methods and available indexes perform differently in various market scenarios. There is not one particular method or index that performs better than the other methods and indexes when observed in all market scenarios.

GENERAL PRODUCT TERMS (continued)

ANNUAL POINT-TO-POINT WITH PARTICIPATION RATE

This method measures index growth using two points in time; the beginning index value and the ending index value. Index-linked gains are calculated based on the growth between these two values multiplied by a participation rate. The annual interest credit will never be less than zero.

TWO YEAR POINT-TO-POINT WITH PARTICIPATION

This method measures index growth using two points in time; the beginning index value and the ending index value at the end of the two-year term. Index-linked gains are calculated based on the growth between these two values multiplied by a participation rate. The interest credit is credited at the end of the two-year term and will never be less than zero.

ANNUAL POINT-TO-POINT WITH INDEX CAP RATE

This method measures index growth using two points in time; the beginning index value and the ending index value. Index-linked gains are calculated based on the difference between these two values. The index growth, if any, is then subject to an Index Cap Rate. The annual interest credit will never be less than zero.

MONTHLY POINT-TO-POINT WITH INDEX CAP

This method uses the monthly changes in the index, subject to a monthly Index Cap Rate, and is based on the sum of all the monthly percentage changes in the index—which could be positive or negative. On each contract anniversary, these monthly changes, each not to exceed the monthly Index Cap Rate, are added together to determine the interest credit for that year. Negative monthly index returns have no downside limit and will reduce the interest credit, but the annual interest credit will never be less than zero.

PROJECTED ILLUSTRATED VALUES

This illustration assumes the index will repeat historical performance and that the annuity's current non-guaranteed elements, such as Index Caps, Index Margins, Participation Rates or other interest crediting adjustments, will not change. It is likely that the index will not repeat historical performance, the non-guaranteed elements will change, and actual values will be higher or lower than those in this illustration but will not be less than the minimum guarantees. The values in this illustration are not guarantees or even estimates of the amounts you can expect from your annuity. Please review the disclosure statement provided with your illustration and Buyer's Guide for more detailed information. All rates are effective as of the date of this illustration and are subject to change at any time.

NOTE ON SIMULATED RETURNS: If an index was established during the last twenty years, performance before the index inception is back-tested.

The results obtained from "back-testing" should not be considered indicative of the actual results that might be obtained from an investment in the index. The actual performance of the index may vary significantly from the results obtained from back-testing. Unlike an actual performance record, simulated results are achieved by means of the retroactive application of a back-tested model itself designed with the benefit of hindsight and knowledge of factors that may have possibly affected its performance. North American products provides no assurance or guarantee that any product linked to the index will operate or would have operated in the past in a manner consistent with these materials. Calculation based on simulated performance is purely hypothetical and may not be an accurate or meaningful comparison. Past performance (actual or simulated) is not necessarily indicative of future results.

The performance of indexes managed to a volatility target will not match the performance of any other index or the markets in general since volatility control tends to reduce both the rate of negative performance and positive performance of the underlying index, thereby creating more stabilized performance.

GLWB RIDER DETAILS
GLWB Roll-up Rate: **8.00% annually for 10 years or LPED if earlier**
GLWB Rider Charge: **1.15% of GLWB Value Annually**

GLWB RIDER TERMS

The Guaranteed Living Withdrawal Benefit (GLWB) rider is designed as a way to generate income payments for life (called Lifetime Payment Amounts (LPA)) for an additional charge, without incurring any applicable surrender charge or MVA, even if the Accumulation Value is reduced to zero. The LPA is based on the age of the Covered Person. The Covered Person(s) is the Annuitant(s). If there are Joint Covered Persons, the LPA is based on the youngest Covered Person.

GLWB VALUE

The GLWB Value is used to calculate the Lifetime Payment Amounts. This value is not used to calculate the Death Benefit or penalty-free withdrawals and cannot be withdrawn as a lump sum. This value can grow based on the GLWB Roll-Up Rate (also referred to as GLWB Value Increase Percentage), prior to the Lifetime Payment Election Date, and any premiums received during the first contract year. Withdrawals (including Lifetime Payment Amounts) will reduce the GLWB Value proportionally. The GLWB value has no surrender value or death benefit value. The GLWB value is not reduced by the GLWB rider charge. The GLWB Value initially equals 100% of the premium.

GLWB ROLL-UP AMOUNT

On the contract anniversary, the GLWB Roll-Up Amount (also referred to as GLWB Value Increase Amount) equals the current GLWB Value times the GLWB Roll-Up Rate (also referred to as GLWB Value Increase Percentage). The GLWB Roll-Up Amount is added to the GLWB Value on the contract anniversary, if the following conditions are met: the Contract Anniversary is within the GLWB Value Increase Period and a withdrawal in a contract year does not exceed the available Penalty-Free Partial Surrender amount. The GLWB Value Increase Period is from the GLWB rider issue date until the earlier of the 10th contract anniversary or the Lifetime Payment Election Date.

GLWB RIDER CHARGE

The GLWB Rider Charge is calculated by multiplying the GLWB Rider Charge Percentage by the GLWB Value on each contract anniversary. This amount will be deducted from your Contract's Accumulation Value on each contract anniversary as long as the rider is in effect.

LIFETIME PAYMENT AMOUNT (LPA)

Once elected, this is the amount that may be received each contract year for the life of the Covered Person(s) even if the Accumulation Value is reduced to zero. The Covered Person, or the youngest Covered Person if there are Joint Covered Persons, must be at least 50 years of age or older to begin receiving LPAs. When you first elect lifetime income payments, you have the option between level or increasing payments. If you elect increasing, on each contract anniversary after LPAs begin, the LPA will increase by a specified rate. Your payments will be based on your current GLWB Value multiplied by the applicable Lifetime Payment Percentage (LPP). Future payments will not decrease so long as you do not withdraw more than the LPA in any Contract Year. If you elect an annuity payout option, the GLWB rider is no longer available to you.

LIFETIME PAYMENT PERCENTAGE (LPP)

The LPP is based on the youngest Covered Person and is shown below.

Lifetime Payment Percentage*		
Attained Age	Level	Increasing
50	6.30%	4.30%
51	6.30%	4.30%
52	6.30%	4.30%
53	6.30%	4.30%
54	6.30%	4.30%
55	6.30%	4.30%
56	6.40%	4.40%
57	6.50%	4.50%
58	6.60%	4.60%
59	6.70%	4.70%
60	6.80%	4.80%
61	6.90%	4.90%
62	7.00%	5.00%
63	7.10%	5.10%
64	7.20%	5.20%
65	7.30%	5.30%
66	7.40%	5.40%
67	7.50%	5.50%
68	7.60%	5.60%
69	7.70%	5.70%

Lifetime Payment Percentage*		
Attained Age	Level	Increasing
70	7.80%	5.80%
71	7.90%	5.90%
72	8.00%	6.00%
73	8.10%	6.10%
74	8.20%	6.20%
75	8.30%	6.30%
76	8.40%	6.40%
77	8.50%	6.50%
78	8.60%	6.60%
79	8.70%	6.70%
80+	8.80%	6.80%

* There will be a 0.50% reduction to the LPP schedule for Joint Covered Persons.

LPA MULTIPLIER (NURSING HOME MULTIPLIER)

The Lifetime Payment Amount can be multiplied by 2 when the covered person is confined to a qualified care facility as defined in the rider. This increased Lifetime Payment Amount is available for up to 5 annual payments after the 2nd contract anniversary. If there are Joint Covered Persons the Multiplier Benefit Conditions and Limitations may be satisfied by either Covered Person. If both Joint Covered Persons satisfy the Multiplier Benefit Conditions and limitations during the same Multiplier Benefit Period, only one LPA Multiplier Benefit will be available during each Multiplier Benefit Period.

LPA RESERVE

After you begin receiving your Lifetime Payment Amounts, the LPA Reserve feature becomes available. If you do not take your full LPA in a contract year, the remaining LPA balance may be added to the LPA Reserve. The owner may elect to withdraw all or part of the LPA Reserve at any time without incurring surrender charges or MVA. Once the LPA Reserve is greater than or equal to the Accumulation Value, the LPA Reserve will stop increasing. Once the Accumulation Value is reduced to zero, any LPA Reserve will be paid out as a withdrawal.

MARKET VALUE ADJUSTMENT (MVA)

Your contract also includes a market value adjustment feature—which may decrease or increase your surrender value depending on the change in the market value adjustment external index rate since your annuity purchase. Due to the mechanics of a market value adjustment, surrender values generally decrease as the market value adjustment external index rate rises or remains constant. When the market value adjustment external index rate decreases enough over time, the surrender value generally increases. However, the market value adjustment is limited to the surrender charge or the interest credited to the accumulation value.

After the MVA is applied, the surrender value will never be less than the Minimum Guaranteed Surrender Value or greater than the Accumulation Value.

Market value adjustments are applied only during the surrender charge period to surrenders in excess of the penalty-free amount. The MVA will not be applied upon death. Changes in the Accumulation Value due to market value adjustment are not quoted in this illustration.

The graph below shows the projected surrender value under sample MVA scenarios as described below during the surrender charge period of the Contract based on the initial premium amount and the assumption that there are no partial surrenders.

For indexes that use an excess return methodology, index performance is reported after subtracting a benchmark rate.

Fixed Index Annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although Fixed Index Annuities guarantee no loss of premium due to market downturns, deductions from your Accumulation Value for additional optional benefit riders could under certain scenarios exceed interest credited to your Accumulation Value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

Withdrawals taken prior to age 59 ½ may be subject to IRS penalties.

Income Pay Pro℠ fixed index annuity is issued on base contract form NA1012A/ICC17-NA1012A.MVA (contract), AE665A/ICC22-AE665A, AE575A/ICC16-AE575A, AE577A/ICC15-AE577A, AE579A/AE579B/ICC15-AE579B/AE608A04, AE584A/ICC15-AE584A, AE583A/ICC15-AE583A, AE638A/ICC21-AE638A (riders/endorsements) or appropriate state variation. Insurance products issued by North American Company for Life and Health Insurance®, West Des Moines, Iowa. Product and features/options may not be available in all states or appropriate for all clients.

Based on the current interpretation of the Model Regulation adopted by AL, AZ, CO, IA, MD, ME, MO, NH, OH, RI and WV, North American is not illustrating the S&P Marc 5% ER index in these states. This illustration may not be used in those states.

The S&P® Multi-Asset Risk Control 5% Excess Return is managed to a volatility target, and as a result the index performance will not match the performance of any other index or the markets in general since volatility control tends to reduce both the rate of negative performance and positive performance of the underlying index, thereby creating more stabilized performance. The S&P® Multi-Asset Risk Control 5% Excess Return has been in existence since 3/27/2017. Ending values in years prior to inception are determined by S&P Dow Jones Indices LLC or its affiliates ("SPDJI") using the same methodology as used currently.

Based on the current interpretation of the Model Regulation adopted by IA, North American is not illustrating the MSDG index in this state. This illustration may not be used in this state.

Based on the current interpretation of the Model Regulation adopted by AL, AZ, CO, IA, MD, ME, MO, NH, OH, RI and WV, North American is not illustrating the Fidelity Multifactor Yield Index 5% ER in these states. This illustration may not be used in those states.

Continued

promote this product, without first contacting Morgan Stanley to determine whether Morgan Stanley's permission is required. Under no circumstances may any person or entity claim any affiliation with Morgan Stanley without the prior written permission of Morgan Stanley.

In calculating the performance of the Index, Morgan Stanley deducts, on a daily basis, a servicing cost of 0.50% per annum. This reduces the positive change or increase the negative change in the Index level and thus decreases the return of any product linked to the Index. The volatility control calculation applied by Morgan Stanley as part of the Index's methodology may decrease the Index's performance and thus the return of any product linked to the Index. In addition, because the volatility control calculation is expected to reduce the overall volatility of the Index, it will also reduce the cost of hedging certain products linked to the Index.

NOTE ON SIMULATED RETURNS: Back-testing and other statistical analyses provided herein use simulated analysis and hypothetical circumstances to estimate how the Index may have performed between April 3, 2007 and March 17, 2022, prior to its actual existence. The results obtained from such "back-testing" should not be considered indicative of the actual results that might be obtained from an investment in the Index. The actual performance of the Index may vary significantly from the results obtained from back-testing. Unlike an actual performance record, simulated results are achieved by means of the retroactive application of a back-tested model itself designed with the benefit of hindsight and knowledge of factors that may have possibly affected its performance. Morgan Stanley provides no assurance or guarantee that any product linked to the Index will operate or would have operated in the past in a manner consistent with these materials. Calculation based on simulated performance is purely hypothetical and may not be an accurate or meaningful comparison. Past performance (actual or simulated) is not necessarily indicative of future results.

Risk Factors:

• The level of the Index can go down. The Index components are exposed to various risks and their market price may be influenced by many unpredictable factors including risks associated with global equities markets, currency exchange rates, interest rates, commodities, and precious metals.

• There are risks relating to the volatility target mechanism. The Index's volatility target mechanism is applied to target an overall level of realized volatility equal to 5% but the realized volatility may be less than or greater than 5% and the volatility target may adversely affect Index performance.

• There are risks associated with leverage. The Index rules contemplate the possibility of leverage within the Index to achieve the 5% volatility target, which is expected to magnify declines.

• The Index has a limited performance history and past performance is no indication of future performance.

• The Index has embedded costs. The components that are used in constructing the Index include adjustments for costs associated with trading within and between various components, as applicable. The return of such components and, as a result, the return of the Index will be lower than if there were no associated costs.

• Purchasers of products linked to the Index will have no access to the assets underlying the Index.

• The Index methodology is fixed subject to certain adjustments and will not change over time even if the Index underperforms a relevant benchmark.

• Morgan Stanley and its affiliates may from time to time engage in transactions involving he components of the Index, which may negatively impact the level of the Index.

The Fidelity Multifactor Yield Index 5% ER (the "Index") is a multi-asset index, offering exposure to companies with attractive valuations, high quality profiles, positive momentum signals, lower volatility and higher dividend yield than the broader market, as well as U.S. treasuries, which may reduce volatility over time. Fidelity is a registered trademark of FMR LLC. Fidelity Product Services LLC ("FPS") has licensed this index for use for certain purposes to North American Company for Life and Health Insurance® (the "Company") on behalf of the Product. The Index is the exclusive property of FPS and is made and compiled without regard to the needs, including, but not limited to, the suitability needs, of the Company, the Product, or owners of the Product. The Product is not sold, sponsored, endorsed or promoted by FPS or any other party involved in, or related to, making or compiling the Index. The Company exercises sole discretion in determining whether and how the Product will be linked to the value of the Index. FPS does not provide investment advice to owners of the Product, nor to any other person or entity with respect to the Index and in no event shall any Product contract owner be deemed to be a client of FPS.

Neither FPS nor any other party involved in, or related to, making or compiling the Index has any obligation to continue to provide the Index to the Company with respect to the Product. Neither FPS nor any other party involved in, or related to, making or compiling the Index makes any representation regarding the Index, Index information, performance, annuities generally or the Product particularly.

Fidelity Product Services LLC disclaims all warranties, express or implied, including all warranties of merchantability or fitness for a particular purpose or use. Fidelity Product Services LLC shall have no responsibility or liability whatsoever with respect to the Product.

The Fidelity Multifactor Yield Index 5% ER strives to create enhanced and stable returns through investing in proven equity factors, while applying excess return and daily volatility control methodologies. The equity component of the index diversifies across six factor indices with fixed weights to each. The Fidelity Multifactor Yield Index 5% ER adds an element of risk control by allocating daily between stocks, as represented by the six equity factor indices, and a dynamic bond overlay which consists of 10-year Treasury Note futures and potentially cash. Because this index is managed to a volatility target, the index performance will not match the weighted underlying performance of the six equity factor indices. Typically, the volatility control tends to reduce the rate of negative performance and positive performance of the weighted value of the underlying indices – thus creating more stabilized performance. The Fidelity Multifactor Yield Index 5% ER value is available at the following website: https://go.fidelity.com/FIDMFY

We reserve the right to add, remove or revise availability of the Fidelity Multifactor Yield Index 5% ER, or to substitute a different published benchmark should the Company, in its discretion, determine that the use of the Fidelity Multifactor Yield Index 5% ER no longer is commercially reasonable. The Fidelity Multifactor Yield Index 5% ER does not constitute a purchase of or direct investment in the index, or in the underlying components of the index. All references to Fidelity Multifactor Yield Index 5% ER values are used with the permission of Fidelity Product Services LLC

Fidelity Multifactor Yield Index 5% ER Index inception was 12/11/19. Returns of the Fidelity Multifactor Yield Index 5% ER prior to inception represent hypothetical pre-inception index performance (PIP), and returns for time frames after this date reflect actual index performance. PIP is based on criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected performance. Actual performance of the index may vary significantly from PIP data. The level of the Fidelity Multifactor Yield Index 5% ER is calculated on an excess return basis (net of a notional financing cost) and reflects the daily deduction of a fee of 0.50% per annum. The fee is not related to the annuity. The hypothetical performance information presented herein does not reflect fees and expenses that an investor would pay in a fixed index annuity. It is not possible to invest directly in an index. All market indices are unmanaged. Not intended to represent the performance of any fixed index annuity.

GOLDMAN SACHS EQUITY TIMEX INDEX (GSEQTMX)

This Index does not include dividends paid by the underlying companies.

The North American Company for Life and Health Insurance® fixed indexed annuity product ("Annuity Product") is not sponsored, endorsed, sold, guaranteed, underwritten, distributed or promoted by Goldman Sachs & Co. or any of its affiliates (including Goldman Sachs Asset Management, L.P.), with the exception of any endorsement, sales, distribution or promotion of this product that may occur through its affiliates that are licensed insurance agencies (excluding such affiliates, individually and collectively, "Goldman Sachs") or its third-party data providers. Goldman Sachs is a trademark of Goldman Sachs and has been licensed for use by North American Company for Life and Health Insurance® (the "Company"). Goldman Sachs and its third-party data providers make no representation or warranty, express or implied, regarding the advisability of investing in annuities generally or in Fixed Indexed Annuities or the investment strategy underlying the Company's Annuity Product, particularly, the ability of the Goldman Sachs Equity TimeX Index (the "Index") to perform as intended, the merit (if any) of obtaining exposure to the Index or the suitability of purchasing or holding interests in the Annuity Product. Goldman Sachs and its third-party data providers do not have any obligation to take the needs of the holders of the Annuity Product into consideration in determining, composing or calculating the Index.

GOLDMAN SACHS DOES NOT GUARANTEE THE ADEQUACY, TIMELINESS, ACCURACY AND/ OR COMPLETENESS OF THE INDEX OR OF THE METHODOLOGY UNDERLYING THE INDEX, THE CALCULATION OF THE INDEX OR ANY DATA SUPPLIED BY IT FOR USE IN CONNECTION WITH THE ANNUITY PRODUCT. GOLDMAN SACHS HEREBY EXPRESSLY DISCLAIMS ANY AND ALL LIABILITY FOR DETERMINING, COMPOSING OR ANY OTHER ASPECTS OF THE DESIGN OF THE INDEX AND ANY RELATED INTELLECTUAL PROPERTY. GOLDMAN SACHS HEREBY EXPRESSLY DISCLAIMS ANY AND ALL LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN OR IN THE CALCULATION THEREOF. GOLDMAN SACHS EXPRESSLY DISCLAIMS ALL LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT OR CONSEQUENTIAL DAMAGE EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

THIRD-PARTY DATA IS USED UNDER LICENSE AS A SOURCE OF INFORMATION FOR THE INDEX. THIRD-PARTY PROVIDER HAS NO OTHER CONNECTION TO THE INDEX OR GOLDMAN SACHS SERVICES AND DOES NOT SPONSOR, ENDORSE, RECOMMEND OR PROMOTE THE INDEX OR ANY GOLDMAN SACHS SERVICES. THIRD-PARTY PROVIDER HAS NO OBLIGATION OR LIABILITY IN CONNECTION WITH THE INDEX OR GOLDMAN SACHS SERVICES. THIRD-PARTY PROVIDER DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF ANY MARKET DATA LICENSED TO GOLDMAN SACHS AND SHALL NOT HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. THERE ARE NO THIRD-PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN THIRD-PARTY PROVIDER AND GOLDMAN SACHS.

The Goldman Sachs Equity TimeX Index is managed to a volatility target, and as a result the index performance will not match the performance of any other index or the markets in general since volatility control tends to reduce both the rate of negative performance and positive performance of the underlying index, thereby creating more stabilized performance. The Goldman Sachs Equity TimeX Index has been in existence since 7/28/2023.

Neither Barclays Bank PLC ("BB PLC") nor any of its affiliates (collectively, "Barclays") is the issuer or producer of fixed index annuities and Barclays has no responsibilities, obligations or duties to policyholders in fixed index annuities. The Barclays Transitions 12 VC Index and the Barclays Transitions 6 VC Index (the "Indexes"), together with any Barclays indices that are components of the Index is licensed for use by North American Company for Life and Health Insurance® as the issuer or producer of fixed index annuities (the "Issuer"). Barclays' only relationship with the Issuer in respect of the Index is the licensing of the Index, which is administered, compiled and published by BB PLC in its role as the index sponsor (the "Index Sponsor") without regard to the Issuer or the fixed index annuities or policyholders in the fixed index annuities. Additionally, the Issuer may for itself execute transaction(s) with Barclays in or relating to the Index in connection with fixed index annuities. Policyholders acquire fixed index annuities from the Issuer and policyholders neither acquire any interest in the Index nor enter into any relationship of any kind whatsoever with Barclays upon making a purchase in fixed index annuities. Fixed index annuities are not sponsored, endorsed, sold or promoted by Barclays and Barclays makes no representation regarding the advisability of the fixed index annuities or use of the Index or any data included therein. Barclays shall not be liable in any way to the Issuer, policyholders or to other third parties in respect of the use or accuracy of the Index or any data included therein.

Barclays Transitions 6 VC Index and Barclays Transitions 12 VC Index inception was 3/31/23. Returns of the Barclays Transitions VC prior to inception represent hypothetical pre-inception index performance (PIP), and returns for time frames after this date reflect actual index performance. PIP is based on criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected performance. Actual performance of the index may vary significantly from PIP data. The level of the Barclays Transitions VC is calculated on an excess return basis (net of a notional financing cost) and reflects the deduction of a fee of 0.50% per annum for the Barclays Transitions 6 VC Index and 0.85% per annum for the Barclays Transitions 12 VC Index plus ETF management fees that varies by exposure and rebalancing costs. The fee is not related to the

Continued

annuity. The hypothetical performance information presented herein does not reflect fees and expenses that an investor would pay in a fixed index annuity. It is not possible to invest directly in an index. All market indices are unmanaged. Not intended to represent the performance of any fixed index annuity.

Sammons Financial® is the marketing name for Sammons® Financial Group, Inc.'s member companies, including North American Company for Life and Health Insurance®.
